App Encryption Documentation

Specify your use of encryption in Xcode by adding the **App Uses Non-Exempt Encryption** key to your app's Info.plist file with a Boolean value that indicates whether your app uses encryption. [Learn More](#)

You're required to provide documentation if your app contains any of the following:

- Encryption algorithms that are proprietary or not accepted as standard by international standard bodies (IEEE, IETF, ITU, etc.)
- Standard encryption algorithms instead of, or in addition to, using or accessing the encryption within Apple's operating system

You can provide your documentation before you submit a build.

[Upload](#)

App Store Regulations & Permits

Digital Services Act

This developer has identified itself as a non-trader for this app. In order to update your app level trader status, you need to complete compliance requirements. [Get Started](#)

Vietnam Game License

If your game is available on the App Store in Vietnam, you can add a game license as required by Vietnamese regulators. [Learn More](#)

[Add](#)

Publication Availability in China Mainland

Chinese law requires apps with book and magazine content to have relevant permits from China's National Press and Publication Administration (NPPA) in order to be available on the App Store in China mainland. If applicable, provide your permit and related documentation. These will be reviewed the next time you submit this app to App Review. [Learn More](#)

[Set Up](#)

China Mainland ICP Filing Number

An Internet Content Provider (ICP) Filing Number is an app registration number from China's Ministry of Industry and Information Technology (MIIT). If you have an ICP Filing Number, provide it here. [Learn More](#)

[Set Up](#)

App Store Server Notifications

App Store server notifications provide information about key events related to your in-app purchases. To test notifications before implementing them in production, you can set up a separate sandbox server URL. [Learn More](#)

App-Specific Shared Secret

The app-specific shared secret is a unique code to receive receipts for only this app's auto-renewable subscriptions. You may want to use an app-specific shared secret if you're transferring this app to another developer, or if you want to keep your primary shared secret private.
